

PACKIA MAHARAJAN | PRODUCT LEADER

PACKIA MAHARAJAN Product Leadership | Enterprise SaaS Strategy | AI-Driven Automation | Stakeholder Management Chennai, India | 9600355421 | packiamaharajan@gmail.com | linkedin.com/in/packia-maharajan

PROFESSIONAL SUMMARY Results-driven Lead Product Manager with 14+ years of experience in enterprise SaaS, product lifecycle management, and high-scale technical architecture. Expert at translating complex business needs into strategic roadmaps and leading cross-functional teams to deliver AI-enabled automation platforms. Proven success in end-to-end product ownership, from customer discovery and PRD authorship to global stakeholder alignment and large-scale enterprise rollout. Experienced translating business and operational requirements into solution blueprints, HLD/LLD artifacts, API contracts, and data models for systems processing 1M+ events/day across 10K+ sites. Proven track record of driving end-to-end AI/ML solution design and intelligent automation workflows through direct engagement with major global operators (Telecom SA, TDC, Claro, Avanti, Mobily), with deep technical flow understanding across the data streaming layer.

STRATEGIC PRODUCT LEADERSHIP STRENGTHS

End-to-End Product Ownership: Directed the complete product lifecycle for AIOps platforms, managing roadmaps, defining MVP scope, and overseeing delivery for global Tier-2 operators.

Cross-Functional Collaboration: Expert at bridging technical engineering teams with business stakeholders, ensuring architectural scalability aligns with user experience and market needs.

Data-Driven Strategy: Leverages advanced analytics and AI/ML insights to drive product innovation, optimize operational efficiency, and deliver measurable business value.

Stakeholder Engagement: Served as a technical authority and Customer Champion for enterprise clients, managing executive expectations and driving product adoption.

CAREER IMPACT AT A GLANCE

Solution ownership: Took telecom AIOps and investigation concepts from customer/problem discovery through solution design, engineering delivery, validation, and rollout.

Scale: Designed for environments handling 1M+ alarm events/day across 10K+ network sites - comparable order of transaction volume to consumer NTN/IoT billing scale.

Architecture reuse: Defined reusable integration and workflow primitives across ~10 use cases, targeting ~20% faster iteration - the same platformization discipline BSS solution blueprints require.

Customer-facing technical authority: Served as Customer Champion for Claro (Tier-1 LATAM operator), representing solution design directly to operator stakeholders - directly relevant to MNO partner-facing BSS discussions.

Delivery leadership: Led AI-assisted engineering practice across three repositories, targeting ~20% lower repetitive effort and ~25% faster delivery.

CORE COMPETENCIES TM Forum / Standards TMF639/TMF 634, TMF638/TMF633, TMF642, TMF656, TM Forum Open APIs, ITU-T X.733 - applicable to TMF632/TMF641 and eTOM/SID/TAM Solution & Integration Architecture HLD/LLD Requirements, Solution Blueprints, API Contracts, Data Modeling, Event-Driven Architecture, Microservices, System Integration, Interface Control Documents BSS Domain (conceptual knowledge) Product Catalog, Order Management, Provisioning, Mediation, Rating, Charging, Billing, Revenue Assurance, OSS-BSS Integration OSS & Network Domain Network Assurance, Fault Management, Network Inventory, Configuration Management, Topology, KPI Analytics, RCA, Network

PACKIA MAHARAJAN | EXPERIENCE

Automation APIs & Data REST APIs, Kafka, Canonical Data Models, Data Contracts, Multi-Source/Multi-Vendor Integration, System Interoperability Product & Delivery Product Strategy, Roadmaps, Discovery, PRDs, Requirements Engineering, Prioritization, Agile Delivery, SIT/UAT AI / Automation AIOps, Anomaly Detection, Forecasting, Event Correlation, Agentic AI, LangGraph, Langfuse, MCP (Model Context Protocol), Workflow Orchestration, Human-in-the-Loop Technology Arango DB, PostgreSQL, Kafka, Neo4j, Flink, REST, Angular, BPMN, StackStorm, SNMP, Netconf/RESTCONF PROFESSIONAL EXPERIENCE Senior Product Manager (Lead Role), AI & Enterprise SaaS - VIAVI Solutions - Chennai, India 2019 - Present Strategic Vision & Roadmap Management: Define and execute the multi-year product strategy for enterprise AIOps solutions, aligning technical innovation with business objectives for global Tier-1 operators. Owned the full lifecycle from discovery to rollout. Product Requirement Engineering: Authored high-impact PRDs, HLD/LLD artifacts, and API contracts for platforms processing 1M+ transactions/day, ensuring scalable architecture and seamless system integration. Enterprise AI Leadership: Leading the design of agentic AI frameworks and automated workflow orchestration (BPMN/LangGraph), reducing delivery cycles by ~25% and repetitive engineering effort by ~20% through platformization. Cross-Functional Stakeholder Management: Championing solution design directly to C-suite and director-level stakeholders at major global MNOs, aligning business needs with agile engineering execution. Multi-source data synthesis: Engineered architecture for ingesting, normalizing, and analyzing high-velocity, multi-source telecom data sets-correlating inventory layer graphs, service topology, performance metrics, and real-time alarm streams into a unified operational data plane. AI/ML-driven correlation: Productized anomaly detection, forecasting, and graph-based event correlation, converting raw alarm streams into grouped incidents with root-cause context - reducing false-positive investigation load at scale. Automation & workflow: Converted expert troubleshooting procedures into structured, machine-executable workflows (BPMN/StackStorm) with explicit inputs, conditions, verification, and downstream actions. Customer & partner engagement: Led customer discovery and served as Customer Champion for Claro (Tier-1 LATAM operator), translating operator pain points into product/solution requirements and aligning customer operations, engineering, architecture, and deployment stakeholders. Global Operator Engagement & AI/ML Solution Delivery: Engaged with major global operators-including Telecom SA, TDC, Claro, Avanti, and Mobily-driving end-to-end AI/ML solution design changes in product. Drove stakeholder interactions, refined operational data requirements, and oversaw complex workflow delivery to enable intelligent automation and advanced network assurance across multi-vendor environments. Selected Product & Solution Impact Automation Workflow - Built a config-driven workflow automation module using "capsules" as reusable, data-driven configuration units instead of per-workflow custom code, orchestrated via LangGraph and connected across data sources through MCP connectors. AI Assistant - Lead an AI agent chat assistant observed with Langfuse observability and seamlessly integrated across multiple telecom data sources. ML-Based Incident Management & Alarm Correlation - Designed a graph/ML-based alarm correlation and root-cause analysis module - multi-vendor alarm normalization, topology-aware correlation, and anomaly-driven incident grouping - cutting noise and manual triage time in high-volume NOC environments (1M+ alarms/day). Multi-Agent Investigation Platform - Spearheaded 0-to-1 solution design for a multi-agent investigation platform for NOC triage, targeting ~20% faster workflow iteration.

PACKIA MAHARAJAN | CAREER & EDUCATION

Agentic SDLC & Engineering Workflows - Modernized the SDLC through multi-agent systems, TDD, Claude Code integration, and session management-accelerating development lifecycles from 2 sprints to 3 days while optimizing multi-agent execution context. EARLIER TELECOM EXPERIENCE CanGo Networks - Chennai, India - 5 years 11 months across Software Engineering, Product Design, and Product Management Deputy Product Manager - CanGo NetworksMay 2016 - Dec 2017 Defined product vision, strategy, and roadmap; translated RFIs, stakeholder input, and customer needs into detailed requirements and prototypes; led a predictive analytics and R&D group connecting analytics to product opportunities. Senior / Software Design Engineer - CanGo NetworksApr 2014 - May 2016 Designed UI/UX, dashboards, and network visualization experiences for topology and telecom analytical products; performed telecom data audit and analysis across Core and Radio domains and multiple vendors. Software Trainee - CanGo NetworksDec 2012 - May 2014 Built web experiences using ASP.NET, HTML5, and CSS3; performed telecom data audit/analysis supporting customer presentations and demos. Career Break - Caregiving (Dec 2017 - Oct 2018); returned to professional work in 2019. OTHER PRODUCT EXPERIENCE Additional Product/UX experience (2018-2023): Delivered product/UI/UX projects across enterprise and startup products, including user research, workflow analysis, design systems, web applications, and complex operational interfaces. EDUCATION Bachelor of Engineering (B.E.), Computer Science University College of Engineering, Thirukkuvalai, Tamilnadu | 2008 - 2012 HSC, Mathematics Sarah Tucker Higher Secondary School | 2006 - 2008 Grade: 90%
